Pharmacokinetic analysis of absorption, distribution and ... Taken together, these data show that, when compared to the reference values computed with the slope-intercept method, the pharmacokinetic analysis performed in the present experiment provided very good estimates of the size and turnover of the BWP for all subjects using a N-CM pharmacokinetic model and with subjects in group 2 with the 1-CM. pharmacokinetics - an overview | ScienceDirect Topics A pharmacokinetic study involves dosing and sampling of animals or subjects, bioanalysis of the biological samples (e.g., blood, plasma, tissues) and analysis of the resulting blood, plasma, or serum concentration versus time data using for example noncompartmental or compartmental pharmacokinetic methods. Pharmacokinetics - Wikipedia Clinical pharmacokinetics (arising from the clinical use of population pharmacokinetics) is the direct application to a therapeutic situation of knowledge regarding a drug's pharmacokinetics and the characteristics of a population that a patient belongs to (or can be ascribed to).

CRAN Task View: Analysis of Pharmacokinetic Data Analysis of pharmacokinetic (PK) data is concerned with defining the relationship between the dosing regimen and the body's exposure to drug as indicated by the concentration time curve to determine a dose. Pharmacokinetic Analysis: A Practical Approach (Pharmacy ... It starts by defining a physiologically meaningful model based on the pharmacokinetic processes involved. The Time Constant Approach recognizes pharmacokinetics as a number of processes that move drugs between physiological compartments, each process occurring at its own characteristic length of time, to correlate descriptive pharmacokinetic events with time constants of pharmacokinetic processes. Pharmacokinetics Software - PKMP Pharmacokinetics is the study of the time course of drug absorption, distribution, metabolism, and excretion from the body. It also relates to these processes to the intensity and time course of therapeutic and adverse effects of drugs and chemicals.
