Philosophy of Biology (Stanford Encyclopedia of Philosophy) Philosophy of biology's naturalism and the continuity of its concerns with science itself is shared with much other recent work in the philosophy of science, perhaps most notably in the philosophy of neuroscience (Bechtel, Mandik et al. 2001. Philosophy of biology - Wikipedia The philosophy of biology is a subfield of philosophy of science, which deals with epistemological, metaphysical, and ethical issues in the biological and biomedical sciences. Although philosophers of science and philosophers generally have long been interested in biology (e.g., Aristotle , Descartes , and even Kant), philosophy of biology only emerged as an independent field of philosophy in the 1960s and 1970s. Philosophy of Biology | Internet Encyclopedia of Philosophy For instance, philosophy of biology makes biology relevant to classic issues in philosophy of science such as causation and explanation, chance, progress, history, and reductionism. It also works to characterize how knowledge is acquired and modified in different areas of biology, and sometimes to clarify the criteria that demarcate science from non-science.

Biology, philosophy of | Britannica.com Biology, philosophy of, philosophical speculation about the concepts, methods, and theories of the biological sciences. The sharp increase in understanding of biological processes that has occurred since the mid-20th century has stimulated philosophical interest in biology to an extent unprecedented since the first formulation of evolutionary theory in the 1850s. Philosophy of Biology - Bibliography - PhilPapers Summary: Philosophy of biology generally covers the issues that arise from the science and history of biology. It includes evolutionary, developmental, environmental and genetic biology, as well as such issues as evolutionary ethics and epistemology, the general notions of biological information, function, classification and heredity. What is Philosophy of Biology? | Closer to Truth What is Philosophy of Biology? We ask the broadest and most fundamental questions about biology, seeking meaning, purpose and implications of biological phenomena and systems. Questions include: life, evolution, emergence, sex, race, morality/ethics, cognition/emotion, social organization, transhumanism, alien intelligences.
